Location İzmir, Türkiye

PROFILE

I have been building end-to-end products on the .NET ecosystem since 2015, across logistics, education, manufacturing, healthcare and media. I have taken ownership of work ranging from ERP (Netsis) integrations and microservice architectures to enterprise platforms on Azure and Google Cloud and ETL/reporting pipelines; at Monovi I led a software development team for four years. Recently I have built AI-powered services with Python/FastAPI (Whisper, Claude API), and in my own projects I ship end-to-end products with .NET 10, Flutter and Rust. What I do best: rewriting legacy systems with modern stacks and turning complex business rules into simple, scalable software.

TECHNICAL SKILLS

Languages	C#, Python, JavaScript / TypeScript, SQL
Backend	.NET 10 / .NET Core, ASP.NET Core MVC & Web API, Minimal API, FastAPI, REST, SOAP
Frontend	React, Vue.js, HTML, CSS, jQuery, Bootstrap
Databases & ORM	SQL Server, PostgreSQL, MongoDB · Entity Framework Core, Dapper, ADO.NET
Cloud & DevOps	Azure (App Service, Functions, API Management, Key Vault, Synapse), Azure DevOps, Docker, DigitalOcean, IIS, Git
Mobile & Desktop	Flutter, Xamarin, Windows Forms
AI	LLM integration (Claude, OpenAI, Qwen VL), Whisper
Reporting	Power BI, SSRS / RDLC

EXPERIENCE

Code35

Aug 2026 – Present

Software Specialist · Remote

- Designing and building, in a two-person team, a middleware API that connects directly to the Netsis ERP database and exposes production and cost data to other systems.
- Modelled a real-time unit cost calculation that replaced a manual process; now extending it with payroll and depreciation items.
- Isolated the ERP from reporting load by routing report queries to PostgreSQL materialized views; writes to the on-premise database go through a secure tunnel with transactions and audit logging.
- Building automation workflows that read invoices, producer receipts and bank statements with LLMs, validate them and post them to Netsis.

Tech: Node.js, SQL Server (Netsis), PostgreSQL, n8n, Docker, DigitalOcean

Mergenova Yazılım Ltd. Şti.

Sep 2025 – Jun 2026

Software Specialist

- Built the microservice backbone used by a karaoke platform's admin panel, terminal app and mobile/web clients with .NET 9 Minimal APIs.
- Delivered a service that generates timestamped song lyrics with a Whisper model we trained.

- Developed FastAPI services for note extraction, pitch analysis and LLM (Claude API) feedback on user performances.
- Wrote FFmpeg-based video generation and performance scoring endpoints.

Tech: .NET 9, C#, Python, FastAPI, React, PostgreSQL, MongoDB, Neo4j, RabbitMQ, Serilog, DigitalOcean

Monovi Bilgi Teknolojileri A.Ş.

Mar 2021 – Jul 2025

Software Development Team Lead (Aug 2021 – Jul 2025) · Software Specialist (Mar – Aug 2021)

- Promoted to team lead six months after joining; led a 5–8 person development team's technical direction, architecture decisions and project delivery for four years.
- **monligo.com** — enterprise application platform on .NET 8 MVC & API, Azure App Service, Key Vault and PostgreSQL; LinkedIn / Microsoft / Google sign-in, multilingual content with Azure AI Services and Google Translate.
- **emlaklira.com** — real-estate tokenization and trading platform with Solidity smart contracts, Azure SQL Ledger, API Management and Functions.
- **Monovi Trace & ICS2** — EU ICS2-compliant data submission for logistics companies; enhancements and a reporting module for the TMS settlement system.
- **Smart Report** — ETL with Azure Synapse and Power BI reporting; data-lake loading and cross-organisation data transformation layers (Azure Functions, APIM, Windows Service).
- Corporate communication app (web + Xamarin), company website and admin panel (.NET 6 + Vue.js), and maintenance of existing web/mobile products.

Tech: .NET Core 3.1–8, C#, Azure, SQL Server, PostgreSQL, EF Core, Vue.js, jQuery, Xamarin, Power BI

Bilsa Yazılım A.Ş.

Jun 2016 – Aug 2017 · Mar 2018 – Feb 2021

Software Developer

- **okulsis.net** school management system: started with Selenium test automation, then built modular sub-projects; improved the PHP (Slim) API and Cordova mobile app; wrote C# tools to update and monitor on-premise school servers.
- **web.bilsa.com.tr** — platform for teachers' extra-lesson pay calculation, designed so new products plug in as modules.
- Desktop app managing classroom smart boards over the web with SignalR; automatic exam staff assignment system; API distributing weekly timetable data.

Tech: ASP.NET, .NET Core, C#, SQL Server, SignalR, PHP (Slim), Apache Cordova, Selenium, SSRS, Jasper Reports

Çağdaş Eczacılık Hizmetleri Bilgi İşlem ve Yazılım Merkezi

Dec 2015 – Jun 2016

Software Developer

- **eczatakip.com** — web, desktop and mobile applications for medication and patient tracking in pharmacies.

Tech: ASP.NET, Web API, ADO.NET, SQL Server, DevExpress, Windows Forms, Apache Cordova

Internships

Yorka Bilgisayar Yazılım — Software Intern

Jul – Sep 2014

Pamukkale University IT Department — Software Intern

Jun – Jul 2014

PERSONAL PROJECTS

Yerel Yemcim

In pilot use · 2026

Turns cooperatives' paper feed/fertilizer price lists into structured data from a photo and offers producers mobile price tracking. Vision-LLM output passes 8 deterministic validators and mandatory human approval before publishing; a multi-dealer version is on the way.

Tech: .NET 10 Minimal API, EF Core, PostgreSQL, Flutter (web + Android/iOS), Qwen VL, Docker, Caddy — 117 backend tests

Local LMS

2026

Self-hosted, privacy-by-design (KVKK) modular learning (LMS) and HR platform. 13 active modules; web, desktop and mobile clients built from a single React codebase.

Tech: .NET 10, React, Tauri v2, PostgreSQL, MinIO, Testcontainers, Playwright — 800+ frontend tests

PlayZone Hub

2026

Multi-tenant SaaS for playgrounds and kids' activity centers: 9 microservices behind an API gateway covering identity, booking & QR check-in, payments, notifications, reporting and media.

Tech: .NET 10, YARP, PostgreSQL, RabbitMQ, Redis, SignalR, MinIO, React + TypeScript, Flutter

EnterpriseForge CodeGen

2026

ABP Suite-style code generation platform that produces Rust backends, Angular front-ends and Flutter mobile apps from entity definitions; template management, JWT + role-based permissions and a post-generation merge conflict resolver.

Tech: Rust, Actix Web, SQLx, PostgreSQL, Angular 17, Flutter, Tera

Meridyen

github.com/saitguzel/world-tv

Android TV live TV & radio app. A three-tier stream health engine hides dead streams and silently fails over to an alternative source for the same channel.

Tech: Kotlin, Jetpack Compose, Media3/ExoPlayer, Room, Hilt — 100 unit tests, GitHub Actions CI

EDUCATION

Pamukkale University — B.Sc. Computer Engineering — GPA 3.04 / 4

2010 – 2015

CERTIFICATIONS

- Advanced PostgreSQL (LinkedIn Learning, 2025)
- Developing CI/CD Solutions with Azure DevOps (LinkedIn Learning, 2025)
